DETAILED ACTION

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

Claim Rejections - 35 USC § 112

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, it is unclear how the second generator can “successively switching between different frequency signals while creating undesired phase discontinuities” since the generator is not the means for switching and there is no means for performing the switching function is recited in claim, where the different frequency signals come from and how the phase discontinuities can be “created”. The same is true for claims 9 and 14.

In claim 9, it is unclear how the recitation “combining the first sweep frequency signal and the successively switched different frequency signals” is read on the preferred embodiment. Insofar as understood, no such means for performing the combining step” is seen on the drawings. Insofar as understood, the mixer of the present invention performs the mixing function, not the combining function. The same is true for claim 14.

Art Unit: 2816

The remaining claims are dependent from the above claims and therefore also considered indefinite.

Allowable Subject Matter

Claims 1-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The claims are allowable because the prior art of record does not show the second generator and the phase coasting unit as combined in the claims.
